

MATH 113 REVIEW FOR EXAM 1

- » Our first exam covers all of the material in our text from Beginning counting up through and including Equivalence Relations. It will not cover the material on Pascal's triangle. (And I am moving the due date for HW 09 to Friday February 20.)
- » This is a 50-minute exam that will take place in class on Wednesday February 18.
- » During the exam, you are permitted to reference one double-sided letter-sized ($8.5'' \times 11''$) sheet of notes.
- » Calculators, computers, phones, collaboration, books, and the Internet are prohibited during the exam.
- » If questions arise during your studying, please feel free to email me.

Suggestions for studying for the exam:

- (1) Review the text (including the Appendix sections on Mathematical writing and Proof templates). Note that the text has exercises that you should try to solve.
- (2) Rewatch the lectures.
- (3) Review the group problems up through Wednesday February 11. There are links to the solutions on the course website.
- (4) Review the homework assignments and the feedback you have received on them.
- (5) Take time to decide what to include in your sheet of notes.
- (6) Relax, and try to enjoy the review process. This is fun material!
